DETAILED ACTION

1. The Examiner has carefully considered Applicant's amendment and accompanying remarks filed August 31, 2001. The rejection in view of Strack et al. (US 5,681,645) has been overcome.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-8 and 20 are rejected under 35 U.S.C. 102(a) as being anticipated by DE 19647458 (DE '458). DE '458 discloses a multi-layered elastic sheet that has at least two porous fibrous outer layers, e.g. non-wovens of polyolefin fibers and at least one central layer consisting of linearly applied adhesive strands. The adhesive is a thermoplastic which is elastic at room temperature. The adhesive strands are applied in a grid shape (abstract) which allows for elastic extension under tension and subsequent retraction. The adhesive is applied by a printing process. A complete translation of this document has been ordered.

Response to Arguments

4. Applicant's arguments with respect to claims 1-8 and 20 have been considered but are moot in view of the new ground(s) of rejection.
